Work Experience

SWE Intern | Enview Technologies LLP | *FastAPI, Postgres, Hatchet, Lambda, GitHub Actions, React* Mar 2026 – Present

- Revamped the **alerts dashboard** with **real-time SSE streaming** that cut new-alert latency from up to **15s to instant** and ended constant polling ~240 req/hr per user, **reducing backend load**; added cursor-based **on-scroll pagination (100/batch)**, and **hierarchy-based role access**.
- Developed a **WebSocket-based task-orchestration service** that runs scripts on **edge devices** and streams logs back in real time, replacing slow SSH-and-terminal debugging with a single API call, **~30× faster**.
- Built **durable Hatchet workflows** for the **CVAT labeling pipeline**, automating daily task discovery, reviewer routing, and label sync to Postgres, replacing a manual tracking-and-approval process.
- Built a **self-healing system** on Hatchet that auto-detects, diagnoses, and resolves **camera, video recorder and edge device failures** across **100+ sites**, cutting manual triage.
- Led **backend migrations** (SQLAlchemy 2.0, Poetry to uv) **cutting CI time 35%**, encrypted device credentials at rest, and retired unused infrastructure to cut cost.

AI Intern | Techsnap Educations LLP | *Python, LangChain, LangGraph, Hugging Face, Ollama* Jun 2025 – Aug 2025

- Deployed **on-prem LLMs, VLMs** with llama.cpp and Ollama, cutting inference latency and keeping enterprise AI workflows secure with no external API dependencies, and built an internal GPT-style interface for usage.
- Built and optimized **RAG pipelines** with LangChain and LangGraph, improving LLM response relevance by **20%**.

Projects

Up.ly | *React, Tailwind CSS, Node.js, MongoDB, Python, MCP, Ollama, LangChain, Chrome Extension* 🌐

- Built a **custom MCP server** exposing structured user profile data as tools, consumed by both **Claude** and **open-source models via Ollama** to generate resumes, cover letters, and interview prep.
- Developed a **Chrome extension** enabling contextual LLM calls that automatically fill complex job application fields based on data served by the MCP.
- Developed **structured skill/harnesses** for resume and cover letter generation, enforcing strict formatting and output constraints to ensure consistent, high-quality results across model runs.

Ashwini | *React, FastAPI, shadcn/ui, Prisma, LangChain, Nivo Charts, Ola Maps* 🌐

- Engineered a real-time **inventory and supply chain dashboard** to track **stock levels, usage patterns, and logistics status**.
- Designed interactive **visual analytics** (charts, KPIs, trend graphs) for shortage detection and demand forecasting; integrated **Ola Maps** to visualize peer distribution across India.
- Implemented secure **CRUD workflows** with role-based access control for administrators and staff, ensuring data integrity.

cUrlBaby | *Java, CLI, Shell, OOP, HTTP* 🌐

- Designed a lightweight **Java-based CLI utility** for API testing, replicating core Postman features with modular **object-oriented patterns**.
- Implemented full **HTTP support** (GET, POST, PUT, DELETE) with **timeout control**, error handling, and a custom **JSON parser** for clear console output.
- Developed an intuitive workflow for streamlined request management and response visualization directly in the terminal.

Student Admin Dashboard | *Next.js, Node.js, MongoDB, JWT, shadcn/ui, Nivo Charts*

- Built a centralized **admin dashboard** serving **200–300 daily active users**, with advanced search, sorting, and filtering — reducing admin lookup time from **3–5 min** in spreadsheets to **10–30 sec**; implemented JWT-based authentication and role-based access control.
- Developed RESTful APIs and interactive analytics dashboards with CSV/XLSX export functionality, reducing report generation time from **30 minutes** to under **2 minutes**.

Skills

Languages & Frameworks: C, C++, Python, JavaScript, React, Next.js, FastAPI, Flutter, Dart

Databases & Backend: PostgreSQL, MongoDB, MySQL, Redis, Firebase, REST APIs

Cloud, AI & Tools: LangChain, Claude Skills/Harness, AWS (EC2, Lambda, S3), Docker, GitHub Actions, Cloudflare

Achievements

- **Open Source:** merged [PR #978](#) into CircuitVerse, fixing a mobile pinch-zoom bug in its Vue.js simulator.
- **2× Hackathon Track Winner:** Won the **PayPal & Fluence Track** at ETHGlobal New Delhi '25 with [BURP](#) 🌐 and the **Coinbase Track** at Unfold '24 with [SMS Protocol](#) 🔗, winning around **\$1K** in prizes. Also competed at SIH, DeFy'24, CodeAgoda, Tata Imagithon, and Bajaj HackRx.

Education

SRM University, Andhra Pradesh

Sep 2022 – Jul 2026

B.Tech in Computer Science and Engineering (AI & ML) • GPA: **8.85** • 25% Merit Scholarship
